

Quality, Environment and Safety Policy

For over 50 years, we at CAME have always placed Quality, Workplace and Product Safety, Technological Innovation, respect and protection of the Environment at the heart of our business model. We have adopted and maintained an active Integrated Management System in accordance with the international standards UNI EN ISO 9001, UNI EN ISO 14001, and UNI ISO 45001, following the organisational model 231.

VISION

We believe in a world where sustainable technological innovation makes people's lives more comfortable, simple and secure.

MISSION

To create a global offer of high-quality technological products and solutions for automation, smart homes access control and security to improve our customers lives and our partners business.

"Forever innovators"

We believe that people are the true driving force of the company, the most valuable resource in which to invest every day. Today, our Group is present in various markets around the world, and this represents a significant growth opportunity.

Our story began in Treviso, where we developed the skills and capabilities that we now export to all our plants, which are strategically located to integrate the quality of Made in Italy with the best international technologies.

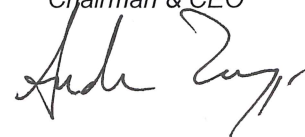

Through detailed and systematic analysis of business processes, we ensure compliance with product requirements and specifications, and prevent pollution and risks to the health and safety of employees, so that potential non-conformities do not affect our competitiveness in the marketplace, failing to fully meet customer needs, or causing harm to the environment or people.

We comply with current laws, technical standards, freely defined rules, and product specifications based on customer needs and expectations, with the application and continuous improvement of the integrated management system involving all stakeholders.

CAME is therefore committed to correlating economic growth and value creation with quality, while protecting health and safety at work, and safeguarding the environment.
