

HEATING: CAME LAUNCHES THE TH/ONE CHRONOTHERMOSTAT WITH MULTI-ZONE MANAGEMENT AND SMART CONTROL

CAME's new chronothermostat, with its slim and elegant design in total-white blending in perfectly with the walls, is one of the few models on the market to integrate the "Matter" protocol, capable of connecting to all voice assistants, eliminating problems of compatibility.

Although the weather is still good, autumn is here, winter is approaching, and in many cities the heating has already been turned on. Choosing the right temperature for the rooms in your home has never been easy: with the new **wall-mounted chronothermostat TH/ONE** from **CAME** - a world-leading made-in-Italy company in the field of integrated solutions - everything is easier thanks to 100% management from smartphones and compatibility with all voice assistants on the market, provided by integration of the **"MATTER protocol"**.

TH/ONE is the perfect fitting, thanks to its slim and elegant design, the total-white color that blends in perfectly with most walls, and its simple and clean LED matrix display; the crown light on the mechanical button indicates, via different RGB colors, the (on/off) status of both the chronothermostat and the heating system. A light sensor controls the light intensity of the device so as to adapt its use in the dark, such as during the night. To maximize the aesthetics, only one physical button is visible on the display, while all the features are activated through soft touch keys.

CAME's new thermostat is very easy to manage: it can automatically detect the temperature, which can, however, be changed quickly and manually using the classic indicator arrows, or by letting the system change it ("Auto" mode) according to the preconfigured time programmer. The Wi-Fi connectivity of TH/ONE allows you to change the configuration or operating modes from the convenient THERMO Wi-Fi App, without having to move from one room to another or get up from the sofa, and of course even when you are away from home, such as in the office or busy with various appointments. TH/ONE can detect not only the temperature, but also the humidity percentage values of the environment where it is installed.

The App has multiple functions, starting from activation of the chronothermostat, which is carried out-as with many smart home devices-using the Pairing procedure. In addition, the App makes planning periods away from home much easier with the "holiday" mode which allows you to select up to 100 days of absence and the temperature you want to maintain in the home, so as to save money and limit consumption. Finally, different frequent use scenarios can be created and applied, also setting up activation through geolocation.

Given all these features, TH/ONE is also suitable for managing the heating control of bed&breakfasts and other small-to-medium sized accommodation facilities, thanks mainly to the App that allows management of multi-zone and multi-site systems using a single account.

CAME

CAME is a leading global brand for high-quality technological solutions and products for automations, smart homes, access control and security and parking systems that can improve the lives of the people who use them and the work of professionals.

With more than 50 years of history behind it, and even longer experience thanks to the companies that now belong to it, the Group founded by Paolo Menuzzo, now President of the holding company, is headquartered in Dosson di Casier, in the province of Treviso, and owns 10 manufacturing sites in Italy, France, Spain, UK, Turkey, and Brazil. Andrea Menuzzo, son of the founder, is the Chairman and CEO of CAME S.p.A. The company has over 2200 employees, serves the market with more than 25 branches and 40 warehouses around the world, and operates in over 110 countries worldwide through partners and distributors with an integrated and global vision. In 2023, it generated a turnover of €309 million.
